

Rubik's Cube 3x3 - Third Layer Cheat Sheet

Step 1: Make the Yellow Cross

Goal: Form a yellow cross on the top (ignore corner orientation).

Algorithm: F R U R' U' F'

- Dot: Do 3 times
- 'L' Shape: Hold like an 'L' in top-left, do 2 times
- Line: Hold line horizontally, do 1 time

Step 2: Align Yellow Edges with Center Colors

Goal: Match edge pieces of the yellow cross to their side center colors.

Algorithm: R U R' U R U² R' U

- Hold one correct edge at the back
- Repeat until all 4 edges are correctly placed

Step 3: Position Yellow Corners (Ignore Rotation)

Goal: Place yellow corners in the right spot (even if twisted).

Algorithm: U R U' L' U R' U' L

- Hold a correct corner at front-right-top
- Repeat until all 4 corners are correctly placed

Step 4: Orient Yellow Corners

Goal: Twist yellow corners to finish the top layer.

Algorithm: R' D' R D (repeat 2 to 4 times per corner)

- Hold unsolved corner at front-right-top
- Only rotate top face (U) to move to next corner
- Do not rotate the whole cube

Rubik's Cube 3x3 - Third Layer Cheat Sheet

Done!

Your cube should now be solved.
